

# ANTI SPLASH, ANTI SPILL PET WATER BOWL

*Thank you for your purchase of of the All Fur You Anti Splash bowl.*

We know you will be very satisfied with your choice both for in home and  
in car use.

*Please read this product manual carefully before using.  
Retain this manual for future reference.*

# DESIGN FEATURES:

## 1. Assembly & Disassembly

The bowl is comprised of only 3 components:

- The fixing strip, to keep the unit together.
- The floating plate, which locks the water from the outside air
- The bowl body, which holds 35 fl oz of water (1 litre)

To disassemble and clean the bowl simply un click the fixing strip from the top of the bowl lip and remove. The floating plate can then be easily removed.

If necessary, the plate itself can be pulled apart for cleaning.

## 2. Auto Seal

The Anti Splash Bowl works by floating the sealing plate on the water, effectively stopping spillage, dust and hair from entering the bowl and preventing your pet immersing their mouth in the water.

The sealing layer rises and falls with the water level. When the water is low, simply add more through the center hole and the plate moves up to the fixing strip.

### 3. Anti Splash Design for In Car Use

The unique sealing design of the All Fur You bowl allows it to be carried in the car without fuss. 35 oz of water is enough to keep your dog content and not risk spillage or leaks along the way.

# HANDY HINTS:

## Please read these four tips before using:

The floating plate can after some use get some water inside it. The plate itself can be disassembled, cleaned and re mounted.

The fixing strip locks the plate in place, simply pop this out on one or two sides and the unit comes apart. The floating plate can be prized apart using your hands.

Re insert the plate and press the fixing strip down on all four sides to lock the plate in place again.

Some pets take a little time to get used to this new water dispenser. Give them some time, help by pressing down the floating plate to show them the water and they will see how it works.
